Task 1: Getting started. First, start Sodbeans. You will create a new project; however, you will not be creating a blank application this time. Instead, in the New Project dialog, select "Quorum Application." You must select this option when using actions due to the way Quorum understands your programs. (We will discuss this later in Chapter 5).

Step 1: Verify SDM template (dual-ipv4-and-ipv6 routing / lanbase-routing)

This lab starts with the switches being configured from the previous lab (5-1, Inter-VLAN Routing). To support IPv6, the correct SDM template must be in use on your switches (the 3560 will use dual-ipv4-and-ipv6 routing while the 2960 will use lanbase-routing).
