Ranking Journals Economics Impact Factor

This list provides a simple impact factor, computing a ratio of the number of citations by the number of items in the series. Citation counts are adjusted to exclude citations from the same series. These computations are experimental and based on the citation analysis provided by the CitEc project, which uses data from items listed in RePEc. Only series or journals with 50 or more items are ranked.

Simple Impact Factors for Economics Journals | IDEAS/RePEc

Ranking of Economics journals based on the Impact Factor. The impact factor, often abbreviated IF, is a measure reflecting the average number of citations to articles published in science and social science journals. In a given year, the impact factor of a journal is the average number of citations received per paper published in that journal during the two preceding years.
